

PLEASE HELP

STOP HS2

THIS CHRISTMAS

As you may know, the Government have delayed deciding on whether or not to go ahead with HS2 until the new year. They are having second thoughts, and even Lord Adonis who came up with the crack-pot idea in the first place admits the Government are wavering.

It is now massively important for us to up the pressure on Government to cancel this project, which is a colossal waste of money, tears up the countryside and does none of the things its' supporters claim.

To put more pressure on and to raise more national awareness and publicity at this crucial time, we have launched a Christmas Single, the 'Oak Tree Lament'. We need you to buy it! It will be available for digital download only and you can get it right now by texting TRACK 7655 to 80818 (cost £1). You can also buy it online and email your MP via the website below. Please pass this on to your family and friends.
